

Product Vision Document:-

Element	Description
For	For homeowners and commercial businesses seeking energy-efficient, environmentally friendly water heating solutions.
Who	Who need to reduce energy costs, comply with environmental regulations, and take advantage of government incentives.
Our Product	Solar-R-Us (SRU) Solar Water Heating System is an advanced, eco-friendly water heating solution.
That	That offers multiple collector options (evacuated tube or flat plate), versatile storage solutions (only solar, conventional water heater, or instant water heater), and cutting-edge technology for superior efficiency and reliability.
Unlike	Unlike traditional and more complex solar water heating systems that have higher costs and lower efficiency,
(Our Product)	SRU's Solar Water Heating System is cost-effective, easy to install, highly efficient, and designed to reduce carbon emissions while providing substantial long-term savings.
